

Substance Abuse Treatment and Prevention Programmes in Berlin

primary function of prevention in Bermuda is
substance use before it starts

including the provision of both universal,
primary and special indicated prevention
and intervention activities

to educate young people to avoid high-risk
behaviours and reject drug use.

delivered by the **Prevention Unit** and **Research Unit**
(both funded by a range of grant-funded programmes).

positive youth development.

risk-taking behaviours.

progression of alcohol, tobacco, and other
among youths who have already begun use.

the other problem behaviors that can co-occur
use of ATODs across the individual's lifespan.

that a range of programming is available in order
the needs of different target groups, based on
and extent of the local drug problems.
