Synthetic Drugs & Chemicals Section  
Drug Enforcement Administration

# **Cooperation With Industry**

---

**Since its conception, DEA has maintained formal and informal relations with regulated industry to insure their participation in the development of laws, rules, and regulations affecting them.**

# Cooperation With Industry

⌚ **DEA's intent is not to impact and disrupt legitimate industry and commerce, but to target illicit activity.**

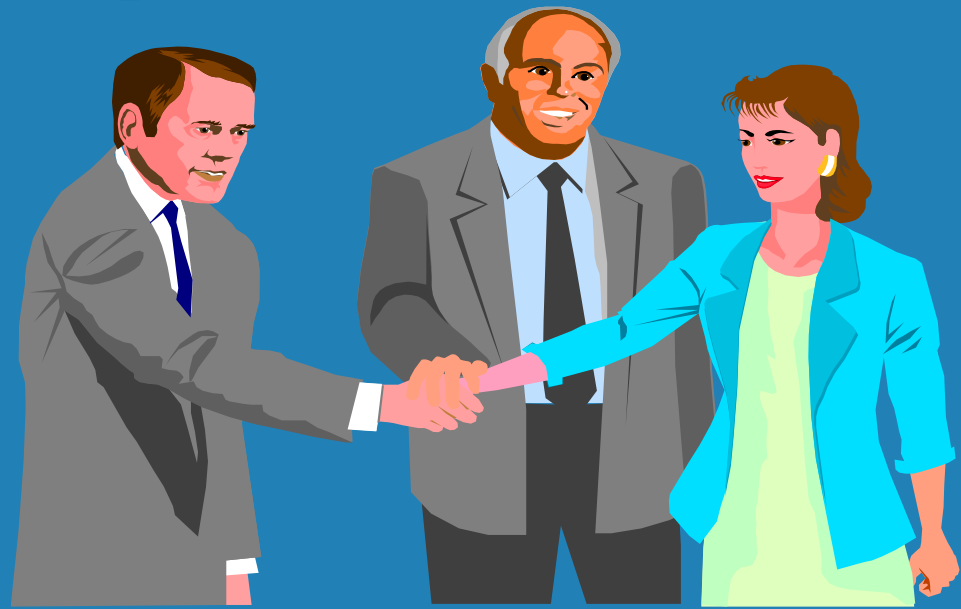

# Cooperation With Industry

∞ The cooperation of the regulated industry is preferable to their antagonism: we can accomplish more as partners than as adversaries.

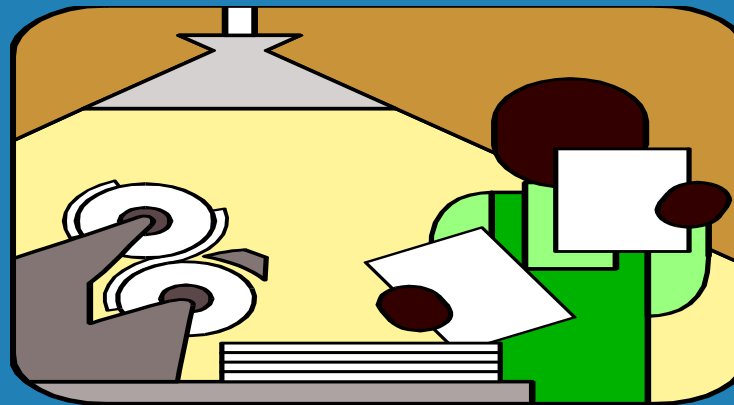

# Cooperation With Industry

Establishing and fostering the concept that regulated industry is a welcome partner in the control of precursor chemicals and synthetic substances.

# Cooperation With Industry

❧ **Publication of guides, opinions, and interpretations of laws, rules, and regulations for the benefit of regulated industry.**

# Cooperation With Industry

As requested by the regulated industry, participating in seminars and conferences to explain DEA's views and positions on matters of interest.

# Cooperation With Industry

- Establishing specific contact points to effectively handle regulated industry inquiries, and to insure easy access to publications and clarifications of DEA's views and positions.

# Cooperation With Industry

- ❧ **Establishing a DEA 'website' on the internet to facilitate access to information.**

# Cooperation With Industry

- ❧ **Hosting conferences and seminars to maintain an open dialogue with regulated industry; interpreting rules and regulations (old and new); and explaining administrative and civil changes.**

# Cooperation With Industry

🌀 **Establishing a 24-hour call site to respond to inquiries, complaints, and requests by regulated industry.**

# Cooperation With Industry

❧ **Training of specialists in registration matters who are accessible during normal working hours.**

# Cooperation With Industry

Ω **With the assistance, collaboration, and cooperation of regulated industry, updating and modifying chemical legislation, based on their opinion and advice.**

# Cooperation With Industry

Ω **For the benefit of regulated industry:  
publishing in the Federal Register  
changes to law and providing an  
opportunity to challenge the changes.**

# Cooperation & Engagement With Industry

Thank you
