

CARIBBEAN MARITIME INSTITUTE

MASTER OF SCIENCE LOGISTICS AND SUPPLY CHAIN MANAGEMENT

CURRICULUM HANDBOOK 2010 – 2012

VISION

“The CMI envision producing ready maritime and logistics leaders through “borderless strategic partnerships, research and applications”.

MISSION

The mission of the CMI is to provide solutions through the application of the knowledge, talents and skills of our team in continuously redefining the boundaries of tertiary Education and professional maritime training through innovation.

TAG LINE

“Redefining Maritime Excellence through Innovation”

OBJECTIVES

- To provide quality maritime education and related technical and vocational training
- To produce graduates of a high caliber in keeping with international requirements
- To provide professional maritime consultancy services
- To serve as the regional maritime information data centre
- To foster and promote professionalism in the development of its staff
- To foster and enhance marine environmental awareness, response and planning in keeping with international conventions

THE UNIVERSITY COUNCIL OF JAMAICA

TERTIARY QUALIFICATIONS FRAMEWORK

The UCJ Tertiary Qualification Framework seeks to provide a comprehensive, coherent, consistent, yet flexible framework for the diversity of qualifications in the tertiary education and training system in Jamaica. The framework presumes that programmes of study lead to specific qualifications, and therefore does not include short courses. The UCJ framework provides a benchmark for commonly defined qualifications in the system.

The tertiary qualifications framework provides a methodology for assessing the qualifications being offered by institutions, and placing a value on them. In this regard, the framework is not intended to exclude any qualification currently being offered by institutions within the Jamaica tertiary education system. The framework allows institutions to identify the true position occupied by the qualifications they offer. In cases where a qualification may be perceived to fall outside the Tertiary Qualification Framework, it is advisable that there be consultation with the UCJ.

The frame work aims to:

- Provide the standard for the use of consistent terminology that is well understood within the tertiary system and outside it, and is consistent with terminology use internationally;
- Encourage individuals to progress through the different levels of education and training by improving access to qualifications, clearly avenues for achievement, and generally contributing to life-long learning;
- Promote national and international recognition of qualifications offered in Jamaica;
- Help with developing flexible pathways which assist persons to move more easily through the education and training system and into the labour market by providing the basis for recognition of prior learning, including credit transfers and experience;
- Offer flexibility to suit the diversity of purposes of education and training;
- Integrate and streamline the requirements of institution , employers, employees, individuals and interested organizations, through dialogue and consultation;
- Provide nationally consistent recognition of outcomes achieved in tertiary education; and
- Encourage the provision of more and higher quality vocational education and training through qualifications that normally meet workplace requirements and vocational needs, thus contributing to national economic performance.

The Tertiary Qualifications Framework is underpinned by the work of the UCJ in the development of Standards for qualifications being offered in different disciplines, and in the registration of institutions and the accreditation of programmes for recognition and acceptability. The framework serves to facilitate the accreditation process from the standpoint of both the institution and the UCJ.

THE MASTERS DEGREE

The Masters Degree in Logistics and Supply Chain Management is a postgraduate qualification, which combines lectures, research, project work and assessment. Learning outcomes at this level include the enhancement of specific professional or vocational skills which may be undertaken by directed coursework and/or research, and the acquisition of in-depth understanding in a specific area of knowledge which is usually undertaken through research.

The duration of the Masters Degree is a minimum of twelve (12) months, full time, and (18) months part time. To graduate students are required to earn sixty (60) credits as follow:

- 30 credits from 12 taught courses.
- 30 credits from a 20,000 word thesis on shipping and/or logistics management and operations.

MISSION OF THE MASTER DEGREE

The enhancement of specific professional skills and the acquisition of in-depth understanding in Logistics and Supply Chain Management.

LEARNING OUTCOME

At the end of the programme, graduates at the master's level are expected to:

- Demonstrate a mastery of concepts dealt with in the programme of study;
- Demonstrate a high level of competence in situations requiring the application of theory to practice;
- Demonstrate technical competence in the specialized field of study;
- Understand communication and be able to communicate effectively, employing various means;
- Argue rationally, engage in deductive reasoning, and draw conclusions based on an analytical approach to data.
- Demonstrate an appropriation for diversity of opinions and thoughts;
- Define and analyze problems effectively, and provide solutions or suggest options;
- Obtain and disseminate information effectively;
- Be able to design and conduct research;
- Be able to participate in strategic planning and implementation exercises;
- Display leadership, decision making and other skills required for executing day to day responsibilities;
- Demonstrate the ability to lead, co-ordinate and work as a member of a team;
- Demonstrate professionalism at the work place; and
- Demonstrate ethical behaviour.

ENTRY REQUIREMENT

- The entry requirement for a Master Degree is normally a Bachelors Degree.
- Any other criteria as may be accepted by the Academic Council.
