## **1. Resumen Ejecutivo**

Initiated in August, 2009, the project is well underway with 11,500 bee specimens digitized, of which approximately 60% have been georeferenced. Two full-time digitizing technicians have been hire and fully trained.

Iniciado en agosto de 2009, el proyecto está marchando muy bien con 11,500 especímenes de abejas digitalizado, con aproximadamente 60% georeferenciado. Dos técnicos de digitación han sido contratados y completamente capacitados.

## **2. Resultados de los productos programados y alcances del proyecto**

11,500 bee specimens have been digitized. Of this total, approximately 60% have been georeferenced (6,900). This percentage is expected to rise very quickly as the next group of approximately 5,000 specimens were all collected at three fixed location as well as the experience gained while georeferencing has significantly improved efficiency.

All specimens georeferenced to date will, within 30 days of this report, be made available to the PTN,

## **3. Metodología empleada y actividades llevadas a cabo para alcanzar los productos programados**

Two, recently graduated entomology students were contracted to digitize the bee collection of Dr. Roubik. All collection information is being entered into an Excel spread sheet. Records are being georeferenced using a combination of gazetteers, Google Earth, on-line maps and field notes.

## **4. Lecciones aprendidas, problemas y soluciones viables**

The only problem encountered was obtaining internet enabled computer for the technicians. Computers were available from day, but they could not be connected to the internet. As a result, there was a delay of approximately one month in georeferencing (although digitizing proceeded ahead of schedule as a consequence).

## **5. Fondos de Contrapartida (adjunto el Reporte de gastos de contrapartida en tabla de Excel)**

## **6. Reporte Financiero (adjunto el Reporte de gastos en tabla de Excel)**

## **7. Anexos**
