

**Organization of American States  
Executive Secretariat for Integral Development - SEDI**

---

Washington D.C., June 13, 2007

Dear Colleagues,

We are pleased to invite you to participate in the Best Practices Forum of the Americas on the application of Information and Communication Technologies (ICT's) for Natural Disaster Mitigation. We will be grateful if you could extend this invitation to experts and staff members of your institution and partner institutions, which may be interested in providing inputs to the discussion and, at the same time, may benefit from it.

The Executive Secretariat for Integral Development (SEDI) of the General Secretariat of the OAS, through the Department of Sustainable Development, is organizing the sixth edition of the Best Practices Forum of the Americas on Natural Disaster Mitigation with the aspiration of "Reaching most vulnerable communities and sectors: Connecting High Technology Information Systems with Community-based Information and Communication Systems". The objective of the Forum is to promote the exchange of consolidated practices and lessons learned through interaction over the Internet.

This Forum is part of the efforts and activities of the Inter-American Network for Disaster Mitigation (INDM) to better integrate disaster prevention, mitigation and risk management in development policies and reduce the vulnerability of communities and sectors hit the hardest by natural disasters. Government officials and professionals on the field of sustainable development from the OAS member States are invited to participate.

The transfer of knowledge and best practices have become very useful for government officials and decision makers throughout the region, since they provide the opportunity to learn from the experience of other countries, while help them sort obstacles and make the best use of their resources.

In this edition of the Forum, three experts on the topic, who are directly involved in the development and implementation of prevention and mitigation plans will share their experiences with the participants, as to exchange institutional experiences and assess common practices to various countries in the Americas.

**The Second online session, Mr. Walter Wintzer**, Focal Point for Preparedness and Response of the Coordination Center for the Prevention of Natural Disasters in Central America (CEPREDENAC), will be presenting the experience of Central America in the design and implementation of a communication and information regional platform.

This session will be held on **Wednesday, June 20, 2007, at 3:00 p.m.** EST (Washington D.C. time).

We hope to count on your active participation.

**Organization of American States  
Executive Secretariat for Integral Development - SEDI**

---

In a third session, the following theme will be presented at the Forum:

- Peru's experience in the implementation of Educational Rural Networks for Disaster Prevention.

The specific dates and topics of each online session are detailed below:

Date	Topic	Speaker
June 06/07	Jamaica's experience in the use of ICT's as an alternate source of communication	<b>Mr. Ronald Jackson</b> , Director General, Office for Disaster Preparedness and Emergency Management (ODPEM)
June 20/07	Central America's experience in the introduction of ICT's to coordinate Centers of National Emergency Operations	<b>Mr. Walter Wintzer</b> , Focal Point for Preparedness and Response of the Coordination Center for the Prevention of Natural Disasters in Central America (CEPREDENAC)
June 27/07	Peru's experience in the implementation of educational rural networks for disaster prevention	<b>Mr. Luis Bolaños</b> , Ministry of Education, Peru

If you haven't been registered yet to the forum and you wish to participate we will appreciate very much that you confirm your interest to participate at by email to Lina Marmolejo at [LMarmolejo@oas.org](mailto:LMarmolejo@oas.org) as soon as possible.

Sincerely,

---

**Pablo González**  
Chief, Natural Hazard Risk Reduction  
Department of Sustainable Development

Co-chair, Inter-American Network for Disaster Mitigation (INDM)
