

Types of absorption of PTS

PTS	ABSORPTION
Aldrin	dermic
Aldrin	oral
DDT	oral
Chlordane	oral
Chlordane	dermic
Chlordane	inhalation
Dieldrin	dermic
Dieldrin	oral
Endrin	oral
Endrin	dermic
Endrin	inhalation
Hexachlorobenzene	inhalation
Hexachlorobenzene	oral
Hexachlorobenzene	dermic
Heptachlor	inhalation
Heptachlor	dermic
Heptachlor	oral
Polychlorinated Biphenyls	inhalation
Polychlorinated Biphenyls	dermic
Polychlorinated Biphenyls	oral
Toxaphene	dermic
Toxaphene	oral
Chlordecone	dermic
Chlordecone	inhalation
Chlordecone	oral
Endosulfan	inhalation
Endosulfan	dermic
Endosulfan	oral
Hexachlorocyclohexane	inhalation
Hexachlorocyclohexane	dermic
Hexachlorocyclohexane	oral
Lindane	inhalation
Lindane	dermic
Lindane	oral
Methyl mercury	inhalation
Methyl mercury	dermic
Methyl mercury	oral
Pentachlorobenzene	inhalation
Pentachlorobenzene	oral
Pentachlorophenol	inhalation
Pentachlorophenol	dermic
Pentachlorophenol	oral
Halogenated methane compounds	inhalation
Hexachlorobutadiene	oral
Hexachlorobutadiene	dermic
Hexachlorobutadiene	inhalation

PTS	ABSORPTION
Paraquat	inhalation
Paraquat	dermic
Paraquat	oral
Parathion	oral
Parathion	dermic
Parathion	inhalation
Parathion	eyes
Benzoperylene	inhalation
Benzoperylene	dermic
Lead	inhalation
Lead	oral
Mercury	inhalation
Mercury	dermic
Methoxychlor	inhalation
Methoxychlor	dermic
Methoxychlor	oral
Toluene	inhalation
Toluene	dermic
Toluene	oral
Cadmium	inhalation
Cadmium	oral
Atrazine	inhalation
Atrazine	oral
Asbestos	inhalation
