

Honoring Jorge Rucks

The UNESCO International Hydrological Program (IHP) presented Jorge Rucks, Chief of Integrated Water Resource Management of the DSD, with an award for his many years of service to the hemisphere in water resources management. Rucks received the award in Asuncion from Maria Concepcion Donoso, Senior UNESCO-IHP officer. Ms. Donoso highlighted Jorge's trajectory and significant accomplishments in the field of water and in particular in the management of shared basins in South and Central America. Jorge Rucks soon to be retired from OAS-DSD has devoted most of his career to supporting OAS member States in the design of policies and schemes for IWRM.
