Microsoft Teams

ME DE LLÍN

OEA RIED

Alcaldía de Medellín

As part of this effort, the Team developed the **International Seminar on Methodology with a STEM Approach**, which will have 4 modules presented by the three participating countries and a total of 40 hours.

The first module took place on May 27 by members from Colombia and had the participation of more than 60 teachers.

120

teachers are expected to be reached (approximately 40 per country).

The course will be certified for 40 hours by ITEN-OAS and the member institutions of the CO-PE-PY team.

This seminar emerges as a training internship through a virtual platform. It is aimed at teachers with a qualifying degree for teaching at the initial level, basic school education, secondary education or higher education, so that they can develop their digital skills and at the same time promote collaborative work through the formation of communities of learning in which interculturality is promoted among Colombia, Paraguay and Peru.

**HORARIO DE CLASE
DISTRIBUCIÓN DE LOS MÓDULOS EN HORARIOS, POR DÍA,
SEMANAS Y SEMESTRES. DEBE COINCIDIR CON LA CARGA**
