Answers from the GS/OAS

- 1. Can the manufacturing or vendor item numbers be updated to the excel? Not just the description. Thank you!**

The list of core items listed represents the items purchased the most by different vendors in the last 4 years. GS/OAS would prefer to leave the description of the items without a specific manufacturer/vendor code and be open to receiving a proposal for pricing on the same or substitute items/brands that could offer the best prices without compromising quality.
