OAS – Government of Chile Scholarship and Training Project for CARICOM Countries

Scholarship Offer in Partnership with The University of Trinidad and Tobago

Available to Citizens of Trinidad and Tobago Only

AVAILABLE COURSES:

1. Site Surveying
2. Reproductive Management
3. Records and Analysis for Sustainable Agribusinesses Courses

▼ DESCRIPTION AND BENEFIT OF PARTICIPATING IN THE COURSE

1. Site Surveying

This course provides an introduction to and an understanding of the principles and procedures used in surveying; it develops an ability to make and record measurements of angles and distances and to determine heights through techniques used currently in the construction industry. Participants will also develop the ability to assess the requirements for surveying and leveling specific sites and select the instruments and techniques most suitable.

Learning Outcomes & Benefits:

Better understanding of basic surveying terms, methods of direct linear measurement, optical reading and electronic theodolites; enhanced ability to acquire data using manual and machine-assisted techniques, measure horizontal angles, illustrate methods of establishing area contours.

2. Reproductive Management

The course is aimed at providing livestock practitioners and professionals with the knowledge and skills needed to understand reproductive management goals and targets, and implement reproductive technologies and management practices including estrus detection, estrous synchronization, artificial insemination, timed artificial insemination, embryo transfer, semen evaluation, breeding soundness examination, pregnancy diagnosis and the evaluation of breeding records to achieve high levels of reproductive efficiency.

Learning Outcomes & Benefits:

Improve knowledge and skills in reproductive management and encourage best practices in using reproductive management techniques to enhance productivity of animals.

3. Records and Analysis for Sustainable Agribusinesses Courses

This course is designed to introduce managerial and record-keeping concepts and tools needed to start and run a successful small agribusiness. Course materials and lab activities will focus on the collection and use of information to assist in whole-farm/agribusiness planning, decision-making, performance evaluation, sensitivity analysis, and management of a small agribusiness. In particular, the course will stress the impact of record-keeping and performance evaluation on the ability of a small agribusiness to achieve its strategic goals.

Learning Outcomes & Benefits:

Enhanced ability to implement accounting and financial planning and increase proficiency in financial record keeping and production record keeping and utilize these in decision making in order to increase productivity and profitability of farm operations.

▼ COURSE OBJECTIVE AND PROFILE OF PARTICIPANTS

1. Site Surveying

Objective: To improve skills in making, recording measurements and assessing surveying requirements

Target Group/Profile of Participants: Diploma level students or those who already have acquired NETD diploma. Persons with a background and/or knowledge in Site Surveying can also apply.

2. Reproductive Management

Objective: To improve reproductive efficiency productivity directly by increasing livestock output, and indirectly by maximizing the rate of genetic improvement in livestock.

Target Group/Profile of Participants: Livestock practitioners and professionals

3. Records and Analysis for Sustainable Agribusinesses Courses

Objective: To improve record keeping and performance evaluation in ensuring profitability and sustainability of small agribusinesses.

Target Group/Profile of Participants: Persons involved in the Agricultural sector and/or involved in the business management component of such businesses.
