

## **SURINAME**

The Ministry of Home Affairs in Suriname is now in a process of implementing some projects regarding **the reform of the Public Sector**. One of those projects is that of the **Inspection of the Public Servant**. With this project an institution has been created that has to exercise control on whether the public servant is performing according to the rules that are set out in the Public Servant Act, others Acts or specific instructions regarding the public servant. This institution shall work closely together with the sections Internal Control and Personal Affairs on each department. The main goal of this project is to increase the efficiency, effectiveness and discipline within the public sector.

Another project has to do with **the swearing in ceremony** that the public servant must submit itself to. With this project the Ministry of Home Affairs wants to make the public servant aware of his responsibilities in order for a better performance. This must also lead to an increase of image of the public servant.
