Training in
Research
production

RESULTS

**Curricula With
drug content**

**Teachers training in
prevention and
drug consumption**

**15 Teachers
Training in research**

**Unit Health
promotion and
prevention on drug
Curricula**

**Project Evaluation
and feedback**

**Systematic
formulation of
community
extension project**

CICAD Meeting with Universities of America on drug Phenomenon from the perspective of Scientific Evidence

WORK IN PROGRESS ASEDEFE

ASEDEFE

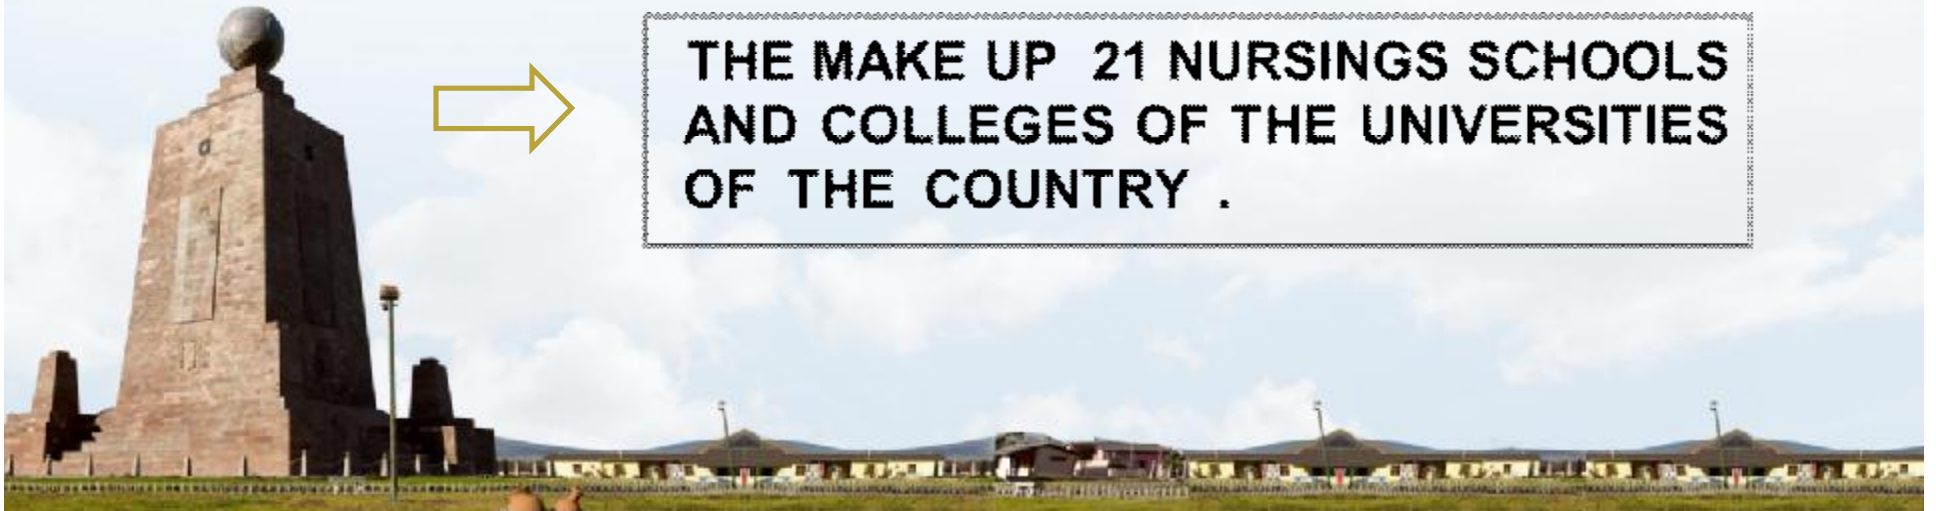

STABLISHED ON FEBRUARY 1968

LEGALLY RECONIZED IN 1978

**THE MAKE UP 21 NURSINGS SCHOOLS
AND COLLEGES OF THE UNIVERSITIES
OF THE COUNTRY .**

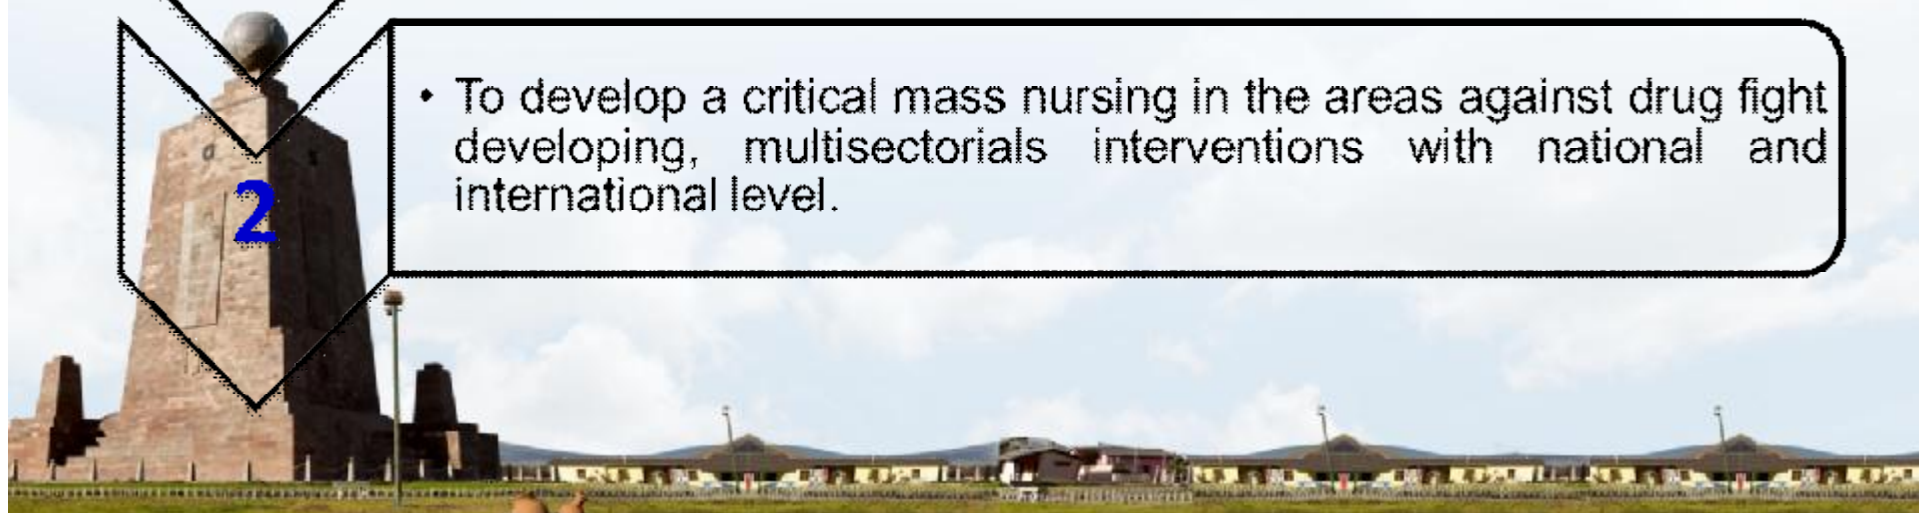

POLICIES AND HUMAN RESOURCES TRAINING

1

- To train nurses for acting Professionally from all areas of practice for reducing demand and consumption in legal and illegal control drugs population at the level institutional and governmental.

2

- To develop a critical mass nursing in the areas against drug fight developing, multisectorials interventions with national and international level.

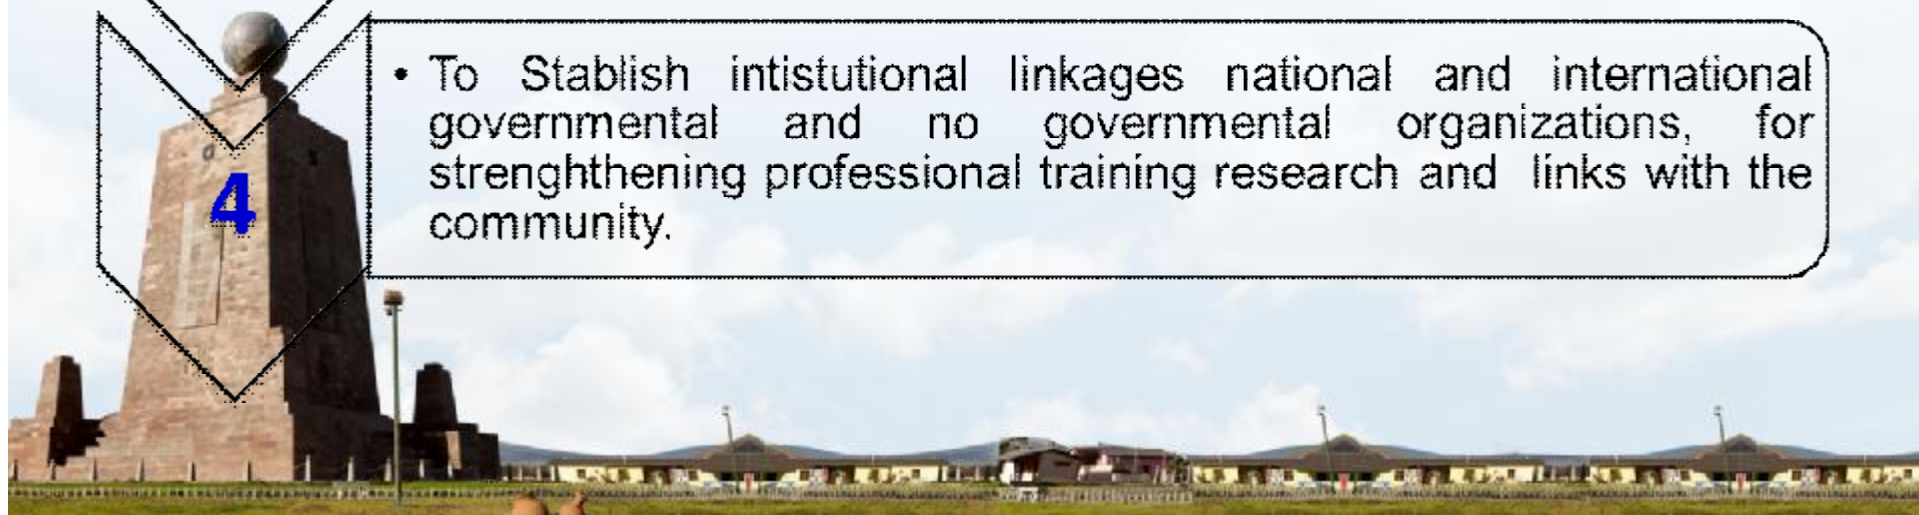

POLICIES AND HUMAN RESOURCES TRAINING

3

- To develop nursing leadership in health services and society for forming a framework in public policy and to reduce drug demand in the countries of the region.

4

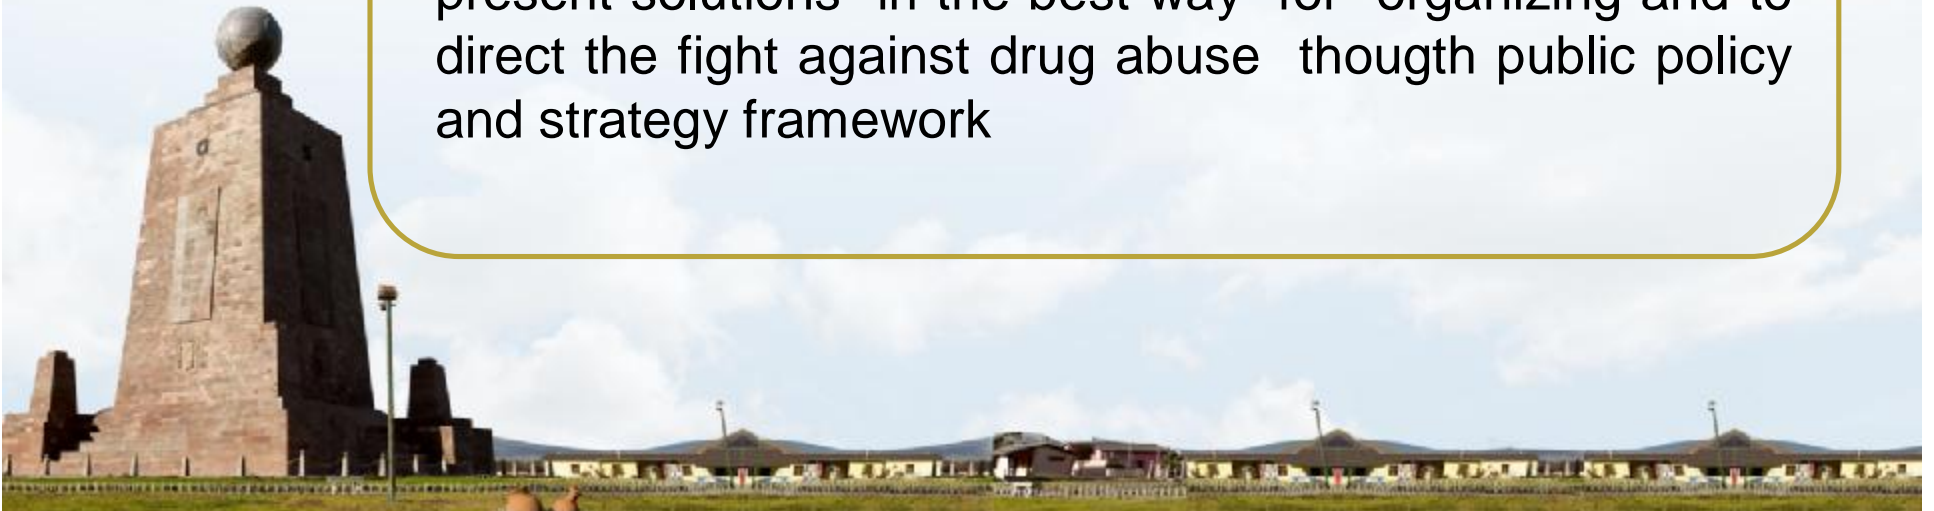

- To establish institutional linkages national and international governmental and non governmental organizations, for strengthening professional training research and links with the community.

ROLE ASEDEFE IN THE FORMATION OF TALENT HUMAN

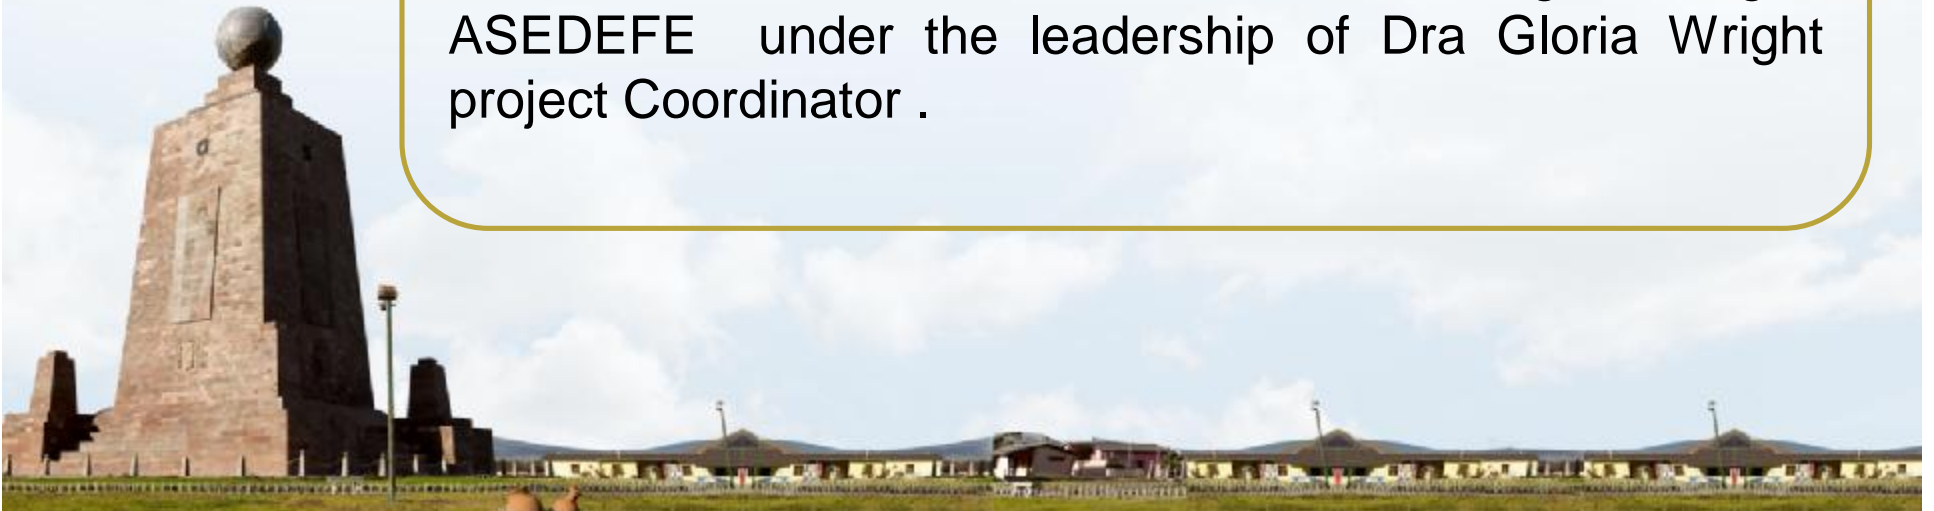

This globalized world demands for specialized professional nurses capable to analyze problems and present solutions in the best way for organizing and to direct the fight against drug abuse through public policy and strategy framework

ROLE ASEDEFE IN THE FORMATION OF THE HUMAN TALENT

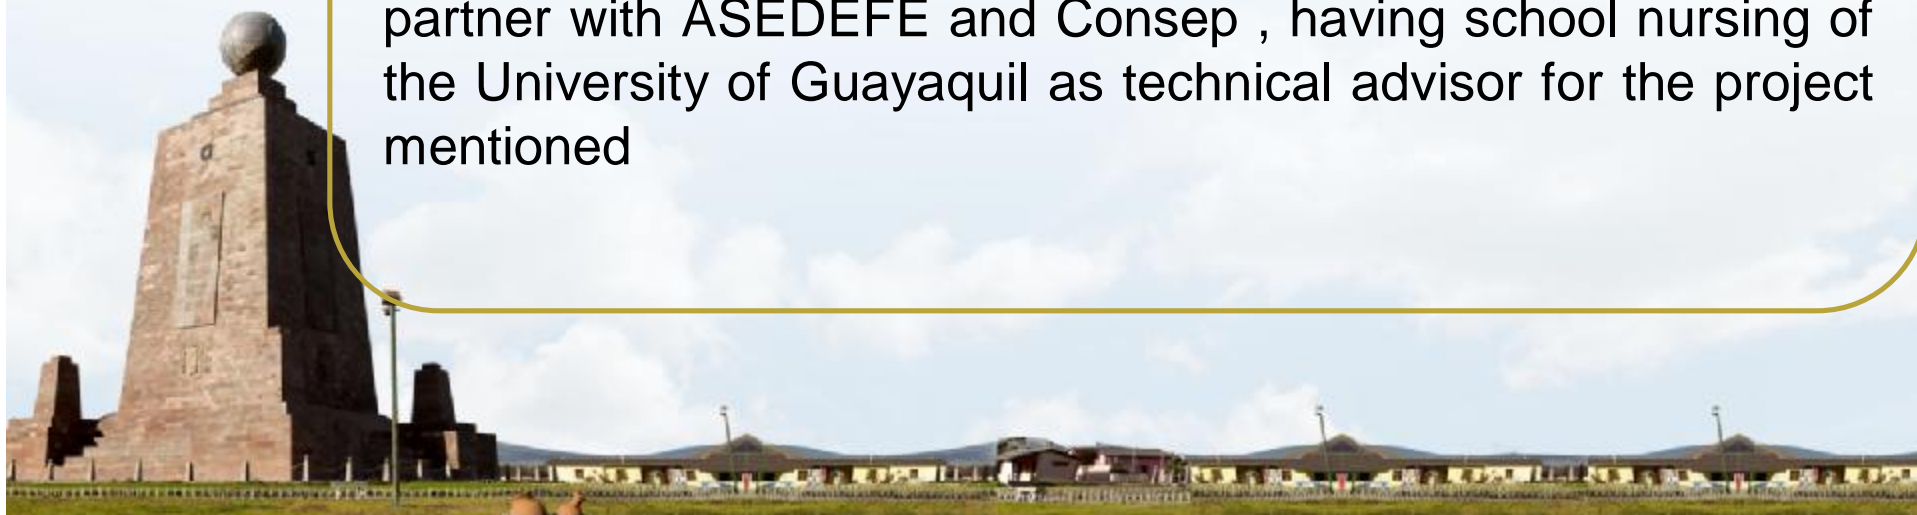

In 2009 by responding to this reality on enhancing drugs in the country continues for developing agreements CICAD/OAS with schools and Nursing colleges ASEDEFE under the leadership of Dra Gloria Wright project Coordinator .

ROLE ASEDEFE IN THE FORMATION OF TALENT HUMAN

By positive experience CICAD with the school of Nursing at the University of Guayaquil, proposed the expansion of 18 schools and Nursing colleges of Ecuador through a working partner with ASEDEFE and Consep, having school nursing of the University of Guayaquil as technical advisor for the project mentioned

ROLE ASEDEFE IN THE FORMATION OF TALENT HUMAN

The Project is focused on three goals :
Professional training nurses in undergraduate and postgraduate degree for acting in the area of reducing drug demand .

To stablish strategic alliances with institutional and community organizations for the promotion and drug prevention.

ROLE ASEDEFE IN THE FORMATION OF TALEN HUMAN

Contribute control consumption of licit and illicit drugs, through knowledge and scientific evidence for supporting public policies against drug phenomenon.

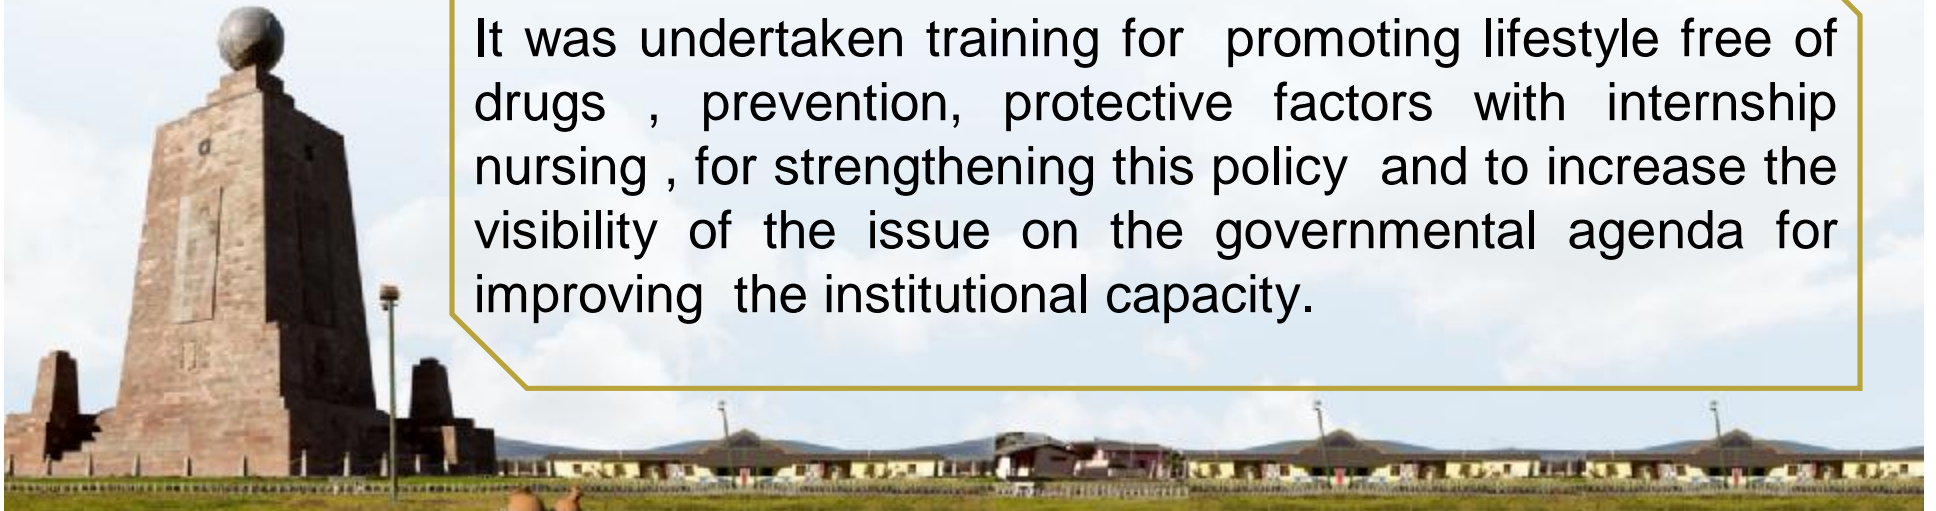

WORK IN PROGRESS

During three years are working in 18 nursing schools and colleges in different provinces, missing three schools for training in the new project.

It was undertaken training for promoting lifestyle free of drugs , prevention, protective factors with internship nursing , for strengthening this policy and to increase the visibility of the issue on the governmental agenda for improving the institutional capacity.

RESULTS ACHIEVED

Were capacited 18 directors of nursing school, 18 teachers coordinators of the project , with the financial support of CICAD/OAS under the leadership of Dr Maria Gloria Wriyth , project coordinator .

14 Schools and Colleges with inclusion drug topic in undergraduate curricula

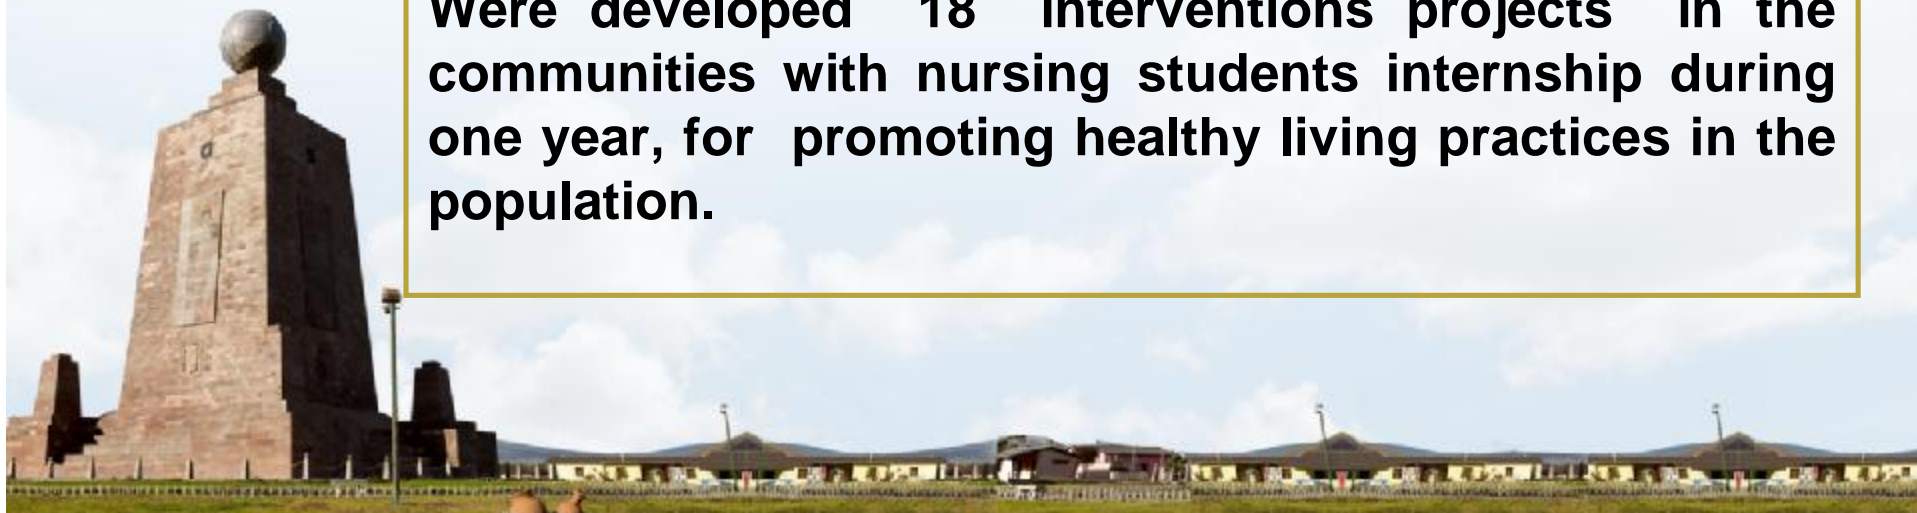

RESULTS ACHIEVED

Were conducted 14 researches on the drug theme in the different schools of the Ecuador provinces .

Were developed 18 interventions projects in the communities with nursing students internship during one year, for promoting healthy living practices in the population.
