# Regional Seminar for National Observatories in the Caribbean

Ramada Georgetown Princess Hotel
Georgetown, Guyana
April 4-5, 2018

## Presentation Outline

**BerDIN** 

The good, the bad, and how it serves as an early warning system.

Its role in monitoring and evaluating national policies and programs.

## Background

A group of people who represent either themselves or an agency that aims to provide Bermuda with factual, objective, and comparable information concerning drugs and drug addiction, and their consequences.

### **MISSION**

The BerDIN is committed to providing the evidence that allows for discussions and decisions to be informed by sound, centrally available, local data, on a wide range of issues that increase understanding of the complex, dynamic, and evolving nature of the Island's drug problem.

### **FACILITATED & COORDINATED BY DNDC**

- ☐ Collect, collate, monitor, analyse, interpret, produce, and disseminate.
- ☐ Standardise drug literature dissemination mechanism and processes.
- ☐ Conduct primary drug-related research.
- ☐ Provide technical assistance and capacity building.

### **PURPOSE**

- Build a Bermuda picture to analyse the situation and the evolution of the phenomenon and responses.
- Compile information used to monitor and assess the implementation of the national drug strategy.

### **OBJECTIVES**

To provide information essential for policy making, organisation of drug-related services, and on drug-related issues of general interest.

Identify existing drug abuse patterns

Identify changes in drug abuse patterns

Monitor changes/ emerging drug problems Raise awareness through dissemination of information Integrate agencies involved in drug reduction or control

## Importance of the BerDIN

- Drug use is a difficult and complex phenomenon to monitor.
  - Multi-source or multi-indicator system is needed to provide insight into various aspects of the drug problem.
- Provides a medium for agencies to report their information.
- It brings together institutions and individuals to exchange drugrelated information, working in the areas of:
  - drug prevention, treatment, education, control, health, and law enforcement.

## Monitoring Mechanisms

From 7 to 32 data providers

45
drug control areas

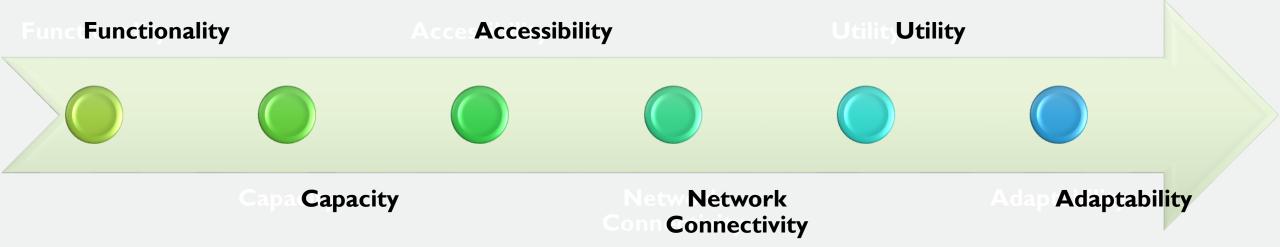

**Since 2006** 

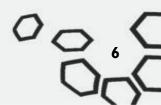

150+
indicators

-year series for most indicators

# BerDIN's Sustainability

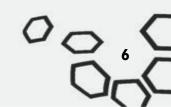

## How Does BerDIN Work?

## **BerDIN Functionality**

- Annual meeting: usually October each year.
- Continuing education: offered to members throughout year.
  - Sponsor members for overseas workshops.
- Advocacy: On-going relationship building with new and existing members.
- Annual budget: to ensure sustainability.
- **Expand**: by add new indicators based on availability of information and quality of data collection methodology.
- Use of IT: Implemented web-based data management system.

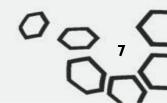

## **How Does BerDIN Work?**

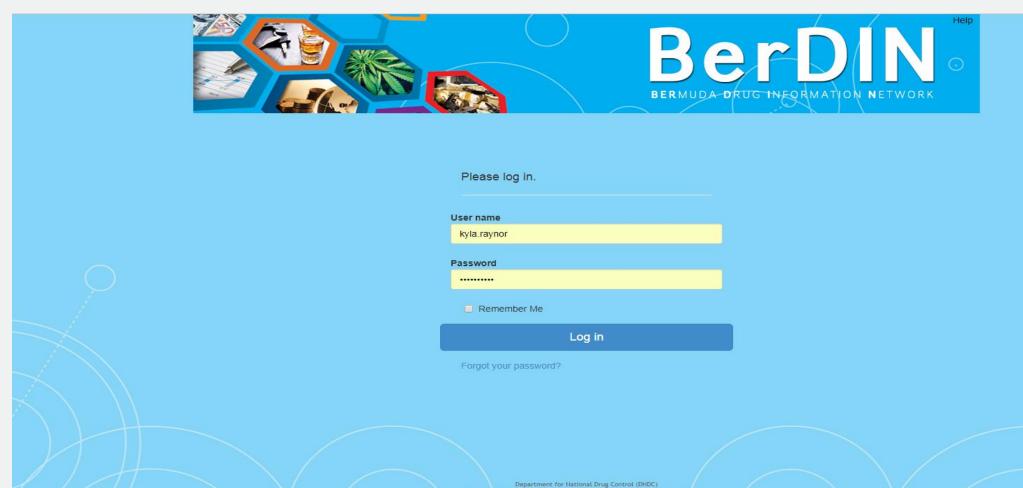

### **Data Management System**

- II years of data housed centrally and electronically
- Other agencies' data can currently be accessed by every user
- Encourage more use/access by members
- Almost full use except by a few agencies, e.g., BPS, BARC
- Features:
  - Help ability and manual
  - Capability to do edits on our own, e.g., editing templates, creating tables
  - Clone reporting period of subsequent reporting cycle.
  - Row and column totals
- Next phase involves public access to BerDIN's data

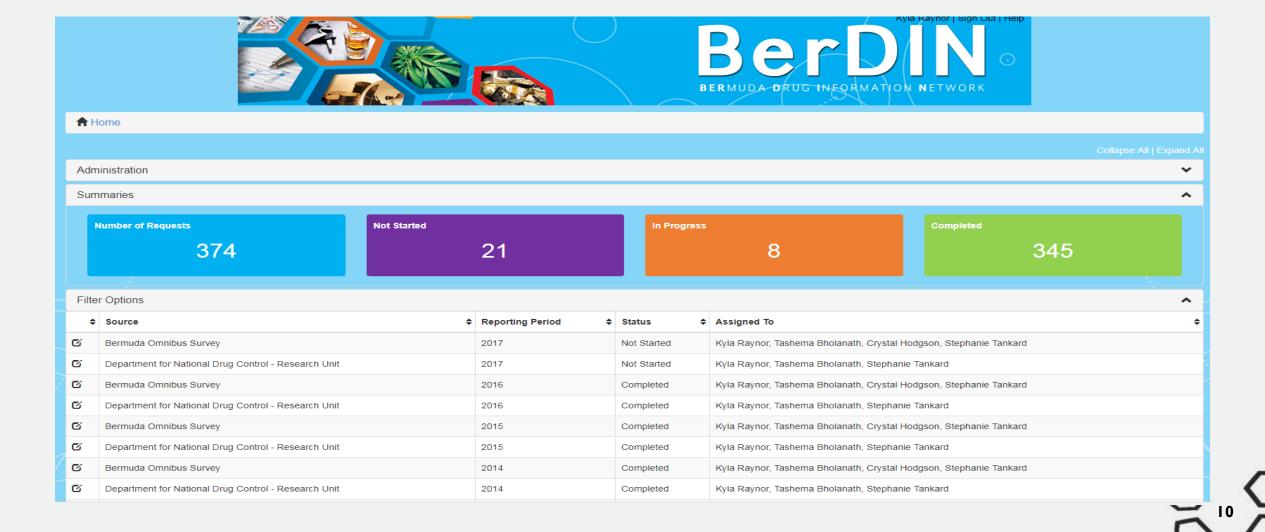

# Login Screen

## Database Details

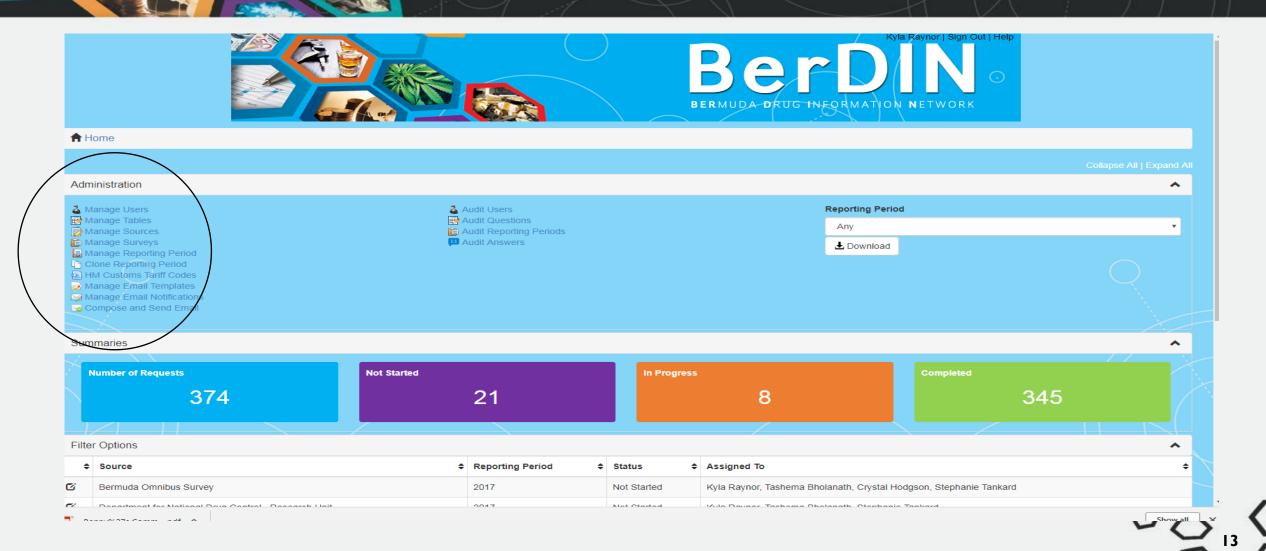

# Detailed Stakeholder View

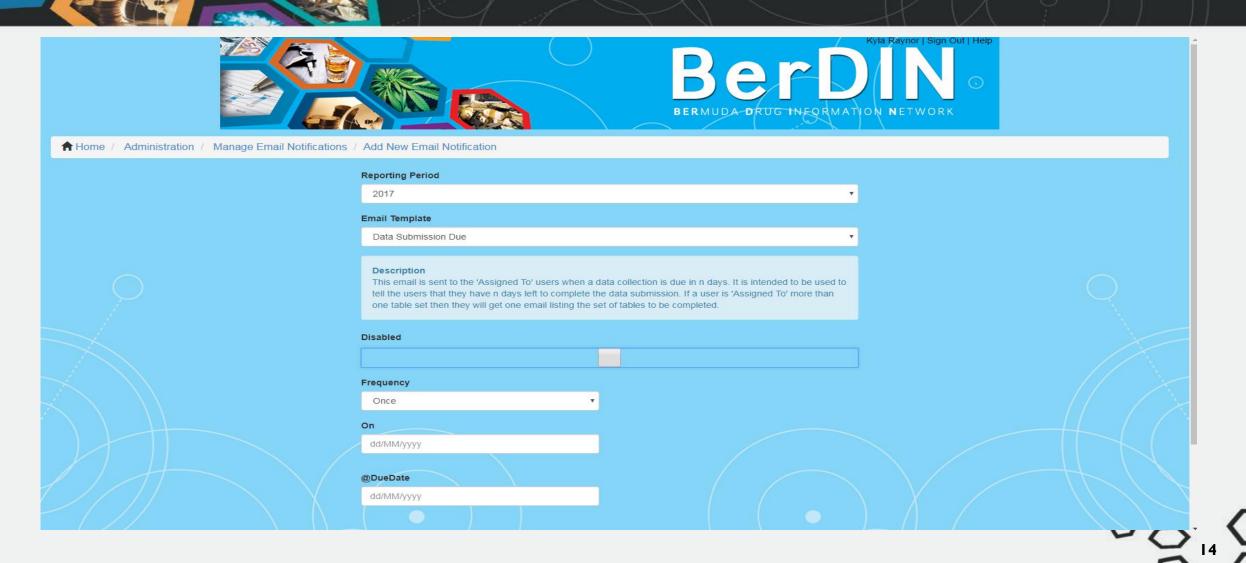

# Data Fields

## Administration

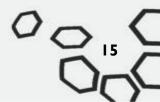

## New Drugs

- Fentanyl
- Molly
- •"Shatter" highly concentrated cannabis resin
- Marijuana edibles (cannabis butter)
- •"Jewel" synthetic cocaine
- •"Cosmic blast" synthetic cathinone (bath salts)

## Early Warning System

- Thus far there is only an informal early warning system.
  - E.g. when Fentanly first entered Bermuda, the BPS, KEMH, HM Customs, Prisons were all aware of its presence on Island with hours.
  - In collaboration with the Central Government Lab, MoH, DPP safety measures were put in place for handling the drug
- From the DAMP and school reports, the treatment and interdiction teams were alerted about the presence of molly and measures taken to implement more awareness and education in schools.
- Introduced the monitoring of new drugs question on the prison intake form within the Department of Corrections.
- BerDIN database system has the capacity to send out early warnings

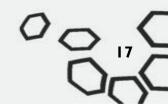

# Policy and Programmes

## POLICY/LEGISLATION

- Social Host Liability
- Roadside Sobriety Checkpoints
- In-prison Substance Abuse Treatment
- Decriminalization of marijuana

## DATA COLLECTION TOOL

- NSS 2011; 2015
- NHS 2013; 2017
- DAMP

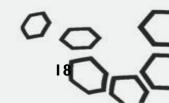

# Programme Monitoring and Evaluation

## **Treatment Services**

- FOCUS, Salvation Army, Turning Point
  - Monitor demand for services, waiting lists
  - Monitor trends in consumption and drug market
  - Early indicator of new substances being used on street

## Example of Indicators

- #new treatment admissions
- DOC
- #persons in treatment
- #of beds
- #of aftercare sessions
- #of community reintegration

# Programme Monitoring and Evaluation

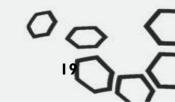

## **Prevention Services**

## • CADA, PRIDE

- Monitor fidelity, outputs
- Monitor lifeskills, changes in knowledge, skills
- New substances being used on street

## **Example of Indicators**

- # of schools participating
- # of classes participating
- #sessions
- # of students engaged
- Evaluation of behaviours
  - Aggression/disruptive behaviours
  - Concentration/attention
  - Social and emotional competence

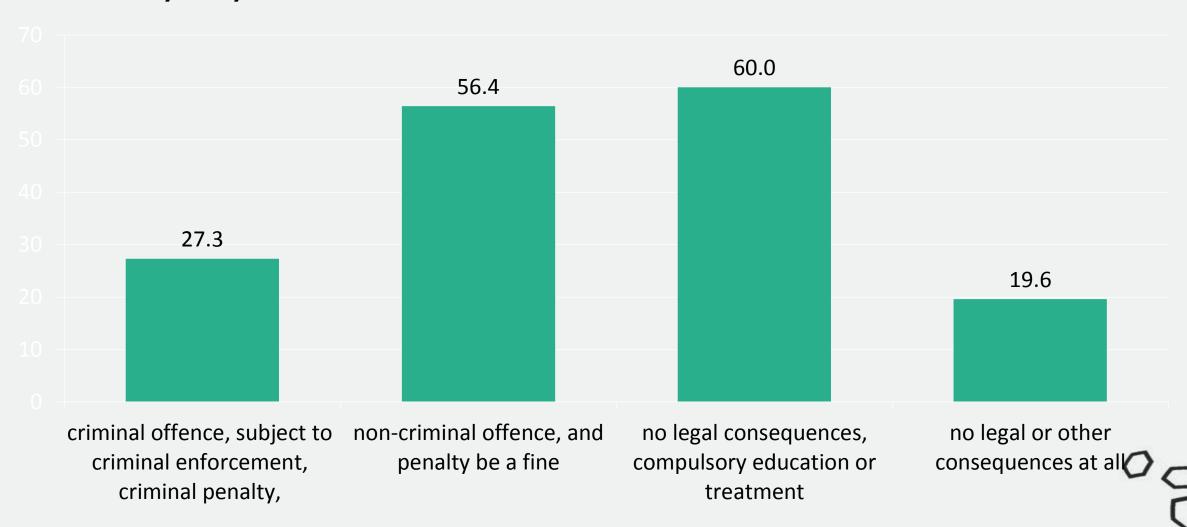

# Alcohol and Drug Policy

Question	YES	NO	DON'T KNOW/ DON'T CARE	NOT STATED
Are you aware that a person should be 18 years or older to be sold alcohol by a licenced establishment in Bermuda?	96.5	3.1		0.4
Are you in favour of laws preventing persons from servicing alcohol to minors in their homes or on their premises?	68.4	26.6	4.6	0.4
Are you in favour of lowering the blood alcohol legal limit from 0.08 to 0.01?	25.7	62.5	11.2	0.6
Are you in favour of roadside sobriety checkpoints?	83.1	13.0	3.6	0.3
Are you in favour of decriminalising small amounts of marijuana for personal use by persons 18 years or older?	48.6	41.3	9.4	0.7
Are you in favour of laws preventing persons from servicing alcohol to minors in their homes or on their premises?	68.4	26.6	4.6	0.4

# Marijuana Policy

### Would you say cannabis use should:

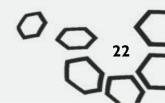

# Marijuana Policy

## In your opinion, what would be the best way to control or regulate personal/recreational cannabis use in Bermuda?

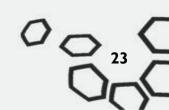

Decriminalize it all together Government control, deal with it in a reasonable way, and have licensed growers Having prescription, which will take away from drug dealers Make it legal and regulate Legalise it and have a dispensary Government control, deal with it in a reasonable way, and have licensed growers Control distribution for adults, limit the amount available Every time they catch someone put them in a rehab, or make them pay To stop it from coming in, particularly the suppliers who distribute it among the community The Police need to enforce the law and catch the supplier It will be difficult to control no matter what they do Do not permit the legalization of cannabis to happen

## Data Gaps

- Drug availability and environment (availability of illicit drugs and drug markets)
  - Trafficking activities and routes
  - Procurement of precursor chemicals and specialist equipment
  - Concealment methods
  - Adulteration steps
- Alcohol and tobacco sales
- Problem drug use
- Drug-related harms

## Unresolved Data Gaps

- Alcohol and tobacco imports (baggage)
- Post-natal drug use (KEMH VII)
- Mandatory breathalyser testing at accidents
- Dual-diagnosed clients

## Organisational Challenges

### **STAFFING**

 Shortages, turnover, or organisation restructure resulting in a need for relationship building and advocacy.

### **DATA**

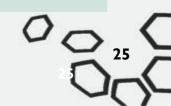

- Changes in terms of what was collected and reported in previous year; missing/incomplete, inconsistent, or no longer collecting certain data.
- Lack of qualitative/ supporting data to supplement quantitative data (e.g., why certain trends were observed)
- Still unable to obtain additional Drug Prevention data to add to the report.

### **DEADLINE**

 Not all agencies met the target submission date.

### **DATABASE**

- Less than 100% utilisation of BerDIN database directly by BerDIN Members.
- Public interface for BerDIN stalled due to lack of capital funding.
