

COM/CITEL RES. 54 (V-9)

**TRAINING DEVELOPMENT IN THE AREA OF ESTABLISHMENT AND OPERATION OF A
NATIONAL REGULATORY AUTHORITY**

The Fifth Meeting of the Permanent Executive Committee of CITEL (COM/CITEL),

CONSIDERING:

That most Member Countries of CITEL are undergoing processes of modernization and privatization – liberalization in the provision of telecommunication services.

That for these processes to be as successful as expected, it is required that national administrations of countries involved become strengthened in the areas of regulation and control of telecommunication services, by means of proper training to staff as necessary;

That the Administration of Ecuador has offered to prepare an initial program intended to identify the requirements of this sector, and to propose solutions in this respect, for which cooperation from other Administrations or pertinent organizations is required;

RESOLVES:

1. To urge the Telecommunication Administrations of member States of CITEL to present to the Administration of Ecuador any training requirements for persons in charge of regulation and control of telecommunication services, as well as any suggestions deemed appropriate.
2. To set a term of 6 months to present contributions, in order to enable Ecuador Administration to prepare the initial program for the next meeting of COM/CITEL.

INSTRUCTS THE EXECUTIVE SECRETARIAT:

To send this Resolution to the Member States of CITEL.
