## OTHER INSTITUTIONS INVOLVED:

## Policy Design

## OBJECTIVES:

The Cure Violence Health Model is a data-driven, research-based, community-centric approach to violence prevention. Cure Violence maintains that violence is a learned behavior and that it can be prevented using disease control methods. The Cure Violence Model has three core components and two implementing components that are essential to disrupt the transmission of violence. Omission of any component is not a faithful replication of the Model and may not achieve anticipated decreases in violence.

## ACTIVITIES:

The general steps for implementation:

- 1) Determine appropriateness of community (high level of violence)
- 2) Engage communities leaders
- 3) Identify appropriate community partners
- 4) Identify appropriate hospital response partners
- 5) Re-examine the data
- 6) Hire credible messengers
- 7) Train workers and receive technical assistance

## RESULTS:

67% in woundings and attempted murders

33% in calls for persons armed with firearms

## PROGRAMATIC INFLUENCES:

No

## INITIATIVE BASED ON EVIDENCE:

## PROVEN IMPACT ON HOMICIDE REDUCTION:

No

## DESIGNED SPECIFICALLY TO REDUCE HOMICIDES:

Yes

## Focus

<b>SOCIAL FOCUS:</b> Yes	<b>TERRITORIAL FOCUS:</b> No	<b>GENDER FOCUS:</b> No	<b>GEOGRAPHICAL COVERAGE:</b> Departmental / Provincial / State
<b>PROGRAMATIC APPROACH:</b> • Prevention: Indicated / tertiary			<b>NAME OF TERRITORIAL UNITS COVERED:</b> Port of Spain

## Target Population

### TARGET POPULATION:

Youth

<b>SOCIO-ECONOMIC LEVEL:</b> All	<b>GENDER:</b> Both	<b>AGE (FROM):</b> 15	<b>AGE (TO):</b> 25
