Youth Academy on Transformative Technologies

A Gateway for Building Skills and Certification for the Jobs of the Future

We are pleased to announce the establishment of the OAS Youth Academy on Transformative Technologies, a platform to address youth’s skills gap and readiness to participate in the digital, virtual, and innovation-driven economies.

The Academy is partnering with leading institutions from academia and the private sector to provide training to up to 10,000 youth by 2024, with a focus on women, youth, rural and indigenous communities, and population in vulnerable situations.

Now, the OAS joins forces with Meta (Facebook) to launch the first training and certification on Augmented Reality (AR), as part of the OAS Youth Academy, providing access to learning AR in the region. The virtual training course will run from January to June 2022 and will be available at no cost to youth from OAS Member States in English, Spanish, and Portuguese.

We invite the youth of the Americas to join us for this exciting launch and learn more about this opportunity.
