2. Bearing in mind that the reports on the countries that were not parties to the MESICIC when the Second Round was held are to include a review of the Convention provisions that were selected for review in that round, the format for the reports corresponding to those countries will be adopted by the Committee in a separate document.
4. Each paragraph in the report, including those in the summary, will be numbered.
In addition to the foregoing, in accordance with provision 34 of the *Methodology for Conducting On-Site Visits*,\(^5\) it will indicate whether the country under review granted or did not grant its consent for such a visit. In keeping with the above provision, in the event that the country under review has not granted its consent and has expressed the reasons for that decision, the country report will refer to those reasons, and if it did consent to the visit, it will allude to the inclusion of that information from that visit in the appropriate sections of the corresponding report.

First, progress, information, and new developments in relation to the implementation of the recommendations formulated to them and the measures suggested to them by the Committee for implementation in the reports from the Second Round and regarding which the Committee deemed required additional attention in the reports from the Third Round, and it will proceed to take note of those that have been satisfactorily considered and those that require additional attention from the country under review. In addition, where appropriate, it will address the continued validity of those recommendations and measures and, as applicable, restate or reformulate them.

This section will also take note of any difficulties in implementing the above recommendations and measures to which the State in question may have drawn attention, as well as of its technical cooperation needs to that end.

Second, it will refer to new developments in relation to the Convention provisions selected for the Second Round, in such areas as legal frameworks, technological developments, and results and proceed to make observations and recommendations that may be required.
