

BIOLOGICAL WEAPONS

CAN THEY BE MANUFACTURED ON A LARGE SCALE?

Yes, **scientific advancements in microbiology** made it possible in the first half of the 20th Century. Many of the biological weapons created on a large-scale were used in the First and Second World Wars.

GENETIC ENGINEERING AND BIOLOGICAL WEAPONS

In the second half of the 20th century, networks of laboratories with advanced technical personnel were created to experiment with new uses of genetic engineering linked to the development of biological weapons.
